1. Product overview

DFS Corporate Portal is the Bank / EMI’s digital channel for corporate entity onboarding and post-activation corporate operations — built for entity accounts (Merchant and Sub-merchant), not retail wallets.

PILLAR 1–2

Onboard • Decide

PILLAR 3–4

Provision • Operate

DECISION TAT

5 working days

For the Institution	For the Corporate Customer
Framework-aligned digital CDD + Annex-C evidence	Guided remote onboarding with clear document lists
Tracking ID & 5-working-day decision target	Transparent status through to activation
Admin controls for sanctions, identity, docs	Single portal for finance views & network
Provisioning into DFS Agent stack	Franchise invites & commission plans
Maker–checker dual control	Role-based operators inside the company

2. Who it is for

Segment	Product fit
Bank / EMI launching or scaling corporate digital onboarding	Primary buyer / operator
Corporate Merchants (parent entities)	Primary end customer
Franchise / Sub-merchants	Network end customer
Partners in Partnership / LLP	Mobile KYC participants
Platform compliance & ops teams	Back-office users

Not for: Retail consumer wallet applicants (out of product scope).

3. Capabilities catalogue

3.1 Acquisition & onboarding

Capability	Description	Status
Merchant self-signup	Email + OTP gated registration	LIVE
Franchise invite onboarding	Parent-issued token binds Sub-merchant	LIVE
Four entity types	Sole Prop, Small Business, Partnership, LLP	LIVE
Entity CDD capture	\$E-style legal, tax, address, purpose fields	LIVE
Annex-C uploads	Type-specific mandatory packs	LIVE
Partner roster	Partnership / LLP partners invited to app KYC	LIVE
Mobile video + biometric KYC	OTP, video, CNIC, selfie, fingerprints	LIVE
Tracking ID & TAT due date	5 working-day decision target	LIVE
30-day draft resume	Incomplete files can continue	LIVE

3.2 Compliance & activation

Capability	Description	Status
Admin review queue	Pending cases with TAT visibility	LIVE
Sanctions workflow	Statusing with manual CLEAR path	LIVE (manual)
Identity workflow	Manual / waived until BV wired	STUB → BV TBD
Document approve/reject	Per-document decision + download	LIVE
Approve / reject party	Written reject reason; activate + credentials	LIVE
Discrepancy notes	Ops communication to applicant	LIVE
DFS account provision	corporateonboarding on approve	FEATURE-FLAGGED

3.3 Day-2 corporate portal

Capability	Description	Status
Dashboard	KYC, provision, finance & network snapshot	LIVE
Balance	Agent balance via Portal API	FEATURE-FLAGGED
Mini-statement	Recent movements via Portal API	FEATURE-FLAGGED
Cards	CMS search / inquiry / status	FEATURE-FLAGGED
Franchise invites	Invite children + proposed commission %	LIVE
Franchise network	Confirm plans; view children	LIVE
Portal users & roles	Party Admin, Maker, Checker, Approver, Releaser	LIVE
Approvals inbox	Dual-control request lifecycle	LIVE

4. Customer journeys

4.1 Corporate Merchant — first time

Discover portal → Sign up → Verify email OTP → Complete entity profile
→ Add partners (if Partnership/LLP) → Upload Annex-C documents
→ Submit → Receive Tracking ID
→ Partners complete mobile KYC
→ Wait for admin decision (target 5 working days)
→ Receive activation credentials → Use dashboard & services

4.2 Partner — mobile KYC

Receive invite (phone + temporary PIN) → Open KYC app
→ Login → OTP → Set password → Complete video challenge
→ Capture CNIC, selfie, fingerprints → Submit → Done

4.3 Franchise expansion

Activated Merchant opens Invites → Sets commission % → Sends link
→ Sub-merchant registers → Completes onboarding & KYC
→ Admin activates → Parent confirms commission plan
→ Parent monitors network from Franchises

4.4 Dual-control action

Party Admin assigns roles → Maker raises request
→ Checker reviews → Approver (if required) → Releaser completes

5. Experience map

Module	User feeling of “done”
Getting Started	Knows documents & eligibility before signup
Onboarding wizard	Entity file complete & submitted
Mobile KYC	Personal identity evidence captured
Admin	Case decided with audit fields populated
Dashboard	Sees activation & provision health at a glance
Balance / Statement	Trusts treasury visibility
Cards	Can locate & inquire corporate cards
Invites / Franchises	Network grows under controlled commission
Approvals	Sensitive actions cannot be solo-executed

6. Compliance posture

Designed against the **SBP Consolidated Customer Onboarding Framework** for **entity** remote onboarding (mapped in BRD).

Control area	Behaviour today	Go-live dependency
Entity CDD + Annex-C	Captured in portal	Client policy sign-off
Location evidence	IP + geo	Browser permission UX
Sanctions	Manual admin CLEAR	Automated vendor TBD
Identity BV/Verisys	Manual / waived path	NADRA integration TBD
TAT	Due date on case	Ops SLA process TBD
EDD	Risk rating + notes / video	Policy calibration TBD

Honest posture: This release is not a claim of full unsupervised production compliance until identity and sanctions vendors are live and client compliance has signed off.

7. Architecture (product view)

Component	Role
DFS Corporate Portal (web)	Applicant & merchant experience; admin UI
DFS Corporate API	Orchestration, rules, storage, integrations
Partner KYC mobile app	Personal KYC capture
DFS Account API	Corporate account provisioning & LOVs
AgentApp Portal API	Balance, mini-statement, MPIN
CMS	Card lifecycle inquiries
MySQL + file store	System of record + KYC media

8. Packaging & environments

Item	Notes
Deployment	Docker Compose sample (API + web + DB volume)
Configuration	Feature flags for Account / Portal / CMS APIs
Notifications	Email when enabled; secure ops logging in non-prod
Environments (dev/UAT/prod)	TBD with client IT
Co-branding / white-label	Soft brands exist; full Bank brand pack TBD

9. Roadmap themes

Theme	Intent	Status
Live biometric identity (NADRA BV/Verisys)	Replace manual identity path	TBD
Automated sanctions screening	Replace manual CLEAR	TBD
Payment initiation behind approvals	Execute PAYMENT / BULK types	TBD
Hard multi-tenant / Bank isolation	If required by hosting model	TBD
Retention & records management	Regulatory retention pack	TBD
Expanded entity types	If client policy expands	TBD
Accessibility & bilingual UX	Urdu / WCAG targets	TBD

10. Commercial model

TBD: Licence / SaaS / transaction fees, onboarding fee schedule, support tiers. Franchise commission economics: product stores *percentage plans* only; settlement is TBD.

11. Positioning notes

DFS Corporate Portal differentiates as a **single corporate stack** — onboarding + compliance decisioning + DFS provision + day-2 portal + franchise network — rather than a KYC form alone. Positioning vs other Bank channels should be confirmed in client workshops (**TBD** messaging).

12. Suggested demo script

1. Land on Home — Merchant vs Sub-merchant story
2. Sign up → OTP → Entity onboarding for Partnership
3. Upload Annex-C sample pack → Submit → show Tracking ID
4. Walk partner mobile KYC happy path (or recorded)
5. Admin: review, clear sanctions, approve
6. Merchant login: Dashboard → Balance/Statement (if APIs on)
7. Create franchise invite → show network
8. Create approval request → Checker/Releaser path

13. Quick reference

Item	Value
Product name	DFS Corporate Portal
Entity types	Sole Prop, Small Business, Partnership, LLP
Party types	Merchant, Sub-merchant
Decision TAT target	5 working days
Draft window	30 days
Portal roles	Party Admin, Maker, Checker, Approver, Releaser
